Overview

This is the user manual for the SIR app for inventory/warehouse management. It's capabilities are meant to be used purely as a means for tracking, logging and managing critical values.

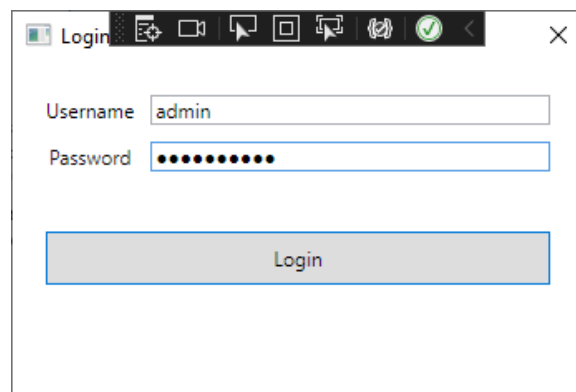

Start and Login

1. Launch the app, the login window will appear.

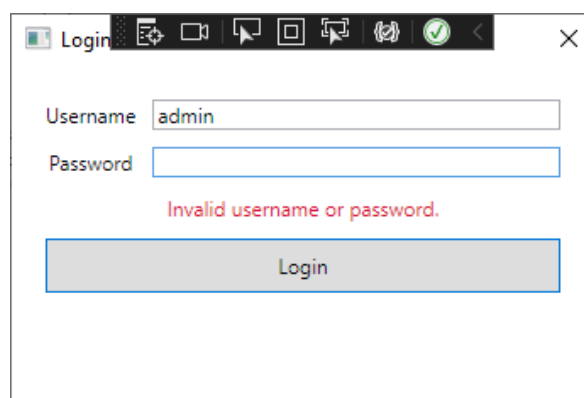

A screenshot of a web application window titled "Login". The window has a standard browser-like title bar with icons for back, forward, and other navigation functions. Inside the window, there are two input fields: "Username" and "Password". Both fields are empty. Below the input fields is a large, light gray button labeled "Login".

2. Enter your username and password. These should be provided with every copy of the app. If you didn't receive your username and password, or have forgotten one of them, contact the manufacturer.

A screenshot of the same "Login" window. The "Username" field now contains the text "admin". The "Password" field is filled with ten black dots, indicating a masked password. The "Login" button remains visible below the fields.

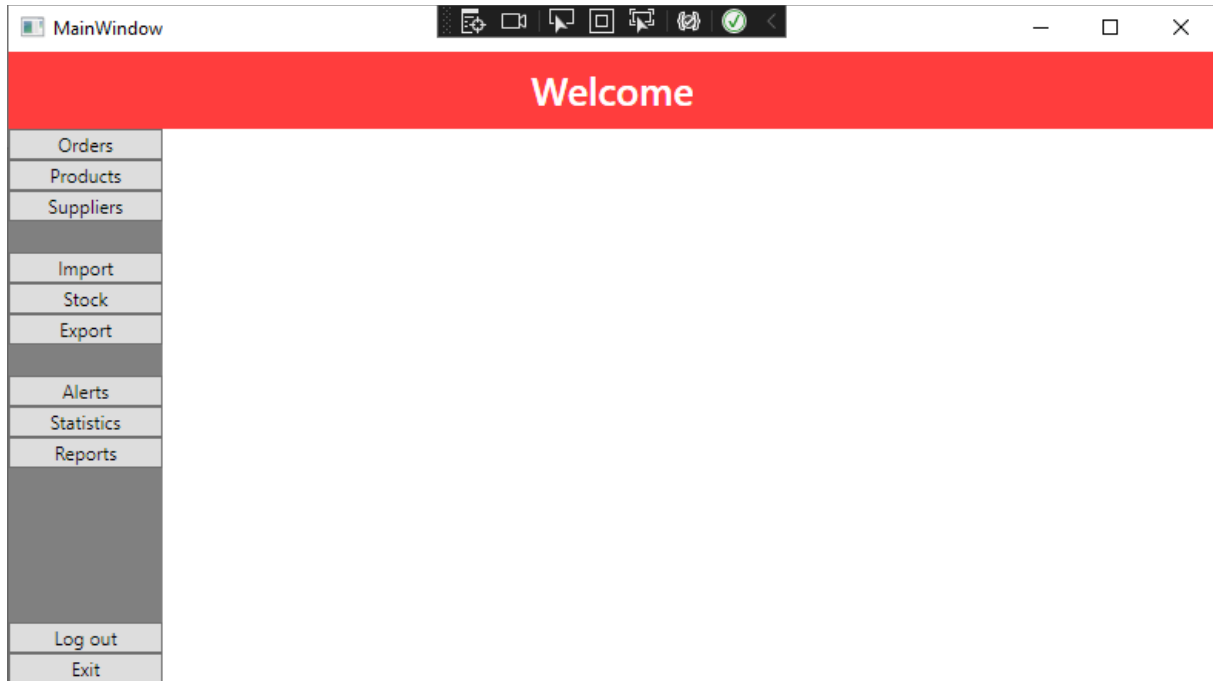

3. If the credentials you put in are invalid, an error message will appear beneath the input fields. The password field will automatically be cleared. Try logging in again or contact the manufacturer.

A screenshot of the "Login" window. The "Username" field still contains "admin", but the "Password" field is now empty. Below the input fields, a red error message reads "Invalid username or password.". The "Login" button is still present at the bottom.

Main Navigation

Once logged in, you will be transported to the Main Page. This is where you will navigate every corner of the app.

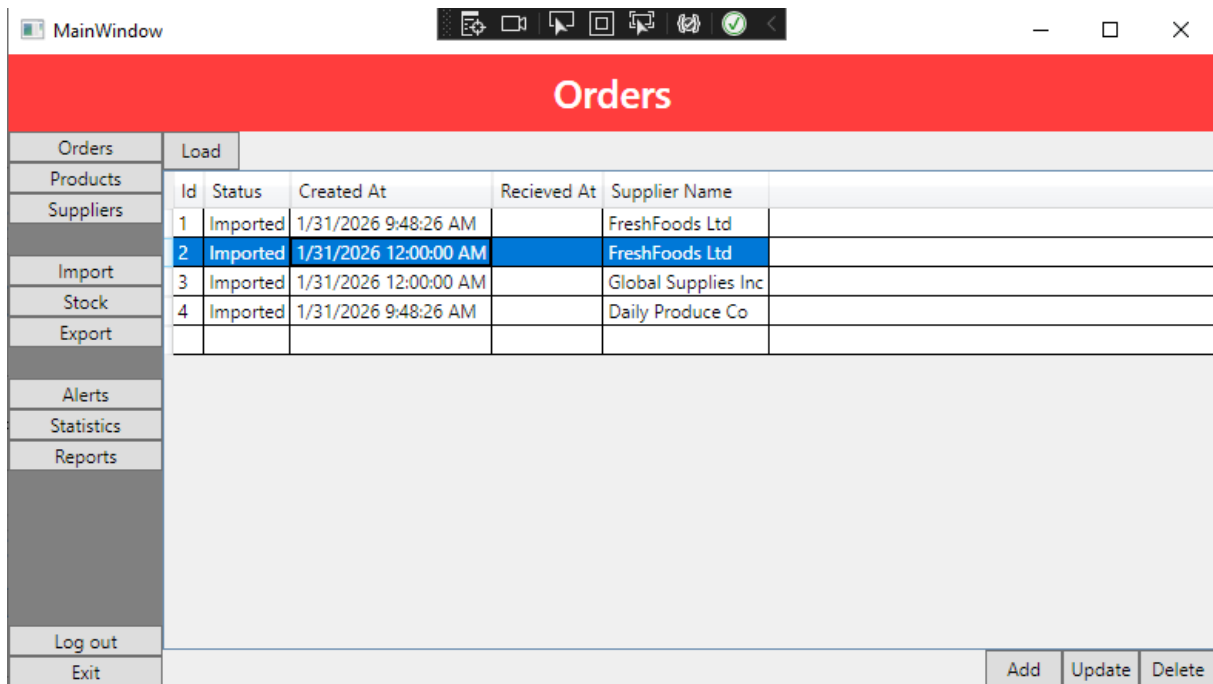

On the left side of the screen is the Main Navigation. It contains buttons to each module, organized in groups according to their functionalities. This includes:

- Orders, Products and Suppliers
- Import, Stock and Export
- Alerts, Statistics and Reports
- Log out and Exit

Orders

The purpose of this page is to create and manage purchases from your suppliers.

Orders					
Orders	Load				
Products		Id	Status	Created At	Recieved At

					Add Update Delete

Main Actions:

- Load: Load orders in the list
- Add: Add a new order to the list
- Update: Edit an existing order
- Delete: Remove an order in the list

Adding/Updating an order

Update order

Supplier: FreshFoods Ltd Status: Imported

Created At: 1/31/2026 Received At: Select a date

Product	Quantity
Milk 1L	60
White Bread	50

Add Item Remove Item

Save Cancel

After clicking the buttons labeled with Add or Update, a new 'modal' window will appear. Clicking the former will open the window empty, while clicking the latter will open the window pre-filled with data from the selected Order. When confirming your changes, if you opened the window by clicking 'Update', the changes will be saved to that existing order.

Each order contains these fields:

- Supplier: The supplier of the order
- Status: Free text (by default 'Created')
- Created At: Date required
- Received At: Optional date
- Items: A list of items, choose one or more products and define their quantities

Rules

- Supplier, Status and Created At are required
- Each order must have a product
- Each product must have a quantity > 0
- The same product cannot be added twice to the same order

Products

The purpose of this page is to create and manage products you distribute/sell in your store.

Adding/Updating a product

The screenshot shows a modal window titled 'Update P' with a standard toolbar at the top. The form contains the following fields and controls:

- Product Code:** Text input field containing 'MILK-001'.
- Name:** Text input field containing 'Milk 1L'.
- Description:** Text area containing 'Whole milk 1 liter'.
- Supplier:** Dropdown menu showing 'FreshFoods Ltd'.
- Reorder Level:** Text input field containing '10'.
- Is Active:** Checkable checkbox that is currently checked.
- Created At:** Text field showing the timestamp '2026-01-31 09:48'.
- Buttons:** 'Save' and 'Cancel' buttons at the bottom right.

After clicking the buttons labeled with Add or Update, a new 'modal' window will appear. Clicking the former will open the window empty, while clicking the latter will open the window pre-filled with data from the selected Product. When confirming your changes, if you opened the window by clicking 'Update', the changes will be saved to that existing product.

Each product contains these fields:

- Product Code: Your store's code for the product
- Name: Name of the product (from the supplier)
- Description: Desc. of the product (from the supplier)
- Supplier: Name of the supplier
- Reorder level: Minimum stock you want to always have in your store
- Is Active: Selling the product currently or not
- Created At: Time of creation

Rules

- Product Code, Name are required
- Supplier is optional, 'No supplier' is allowed
- Reorder level must be ≥ 0
- Created At is automatically filled

Suppliers

The purpose of this page is to create and manage the suppliers your business interacts with.

Update

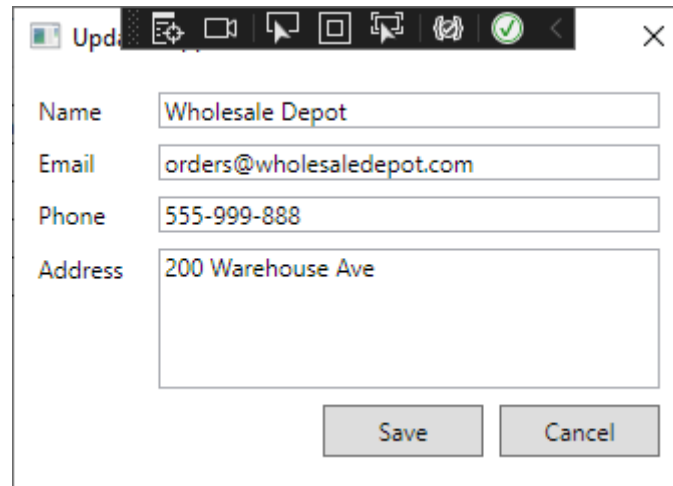

Main Actions:

- Load: Load suppliers in the list
- Add: Add a new supplier to the list
- Update: Edit an existing supplier

Secondary Actions:

- All products from this supplier: Opens the products modal window with this supplier applied to the dropdown filter

Adding/Updating a supplier

A screenshot of a 'Update Supplier' modal window. The window has a title bar with the text 'Update Supplier' and a close button (X). Below the title bar is a toolbar with icons for adding, deleting, and other actions. The main area contains four text input fields: 'Name' with the value 'Wholesale Depot', 'Email' with the value 'orders@wholesaledepot.com', 'Phone' with the value '555-999-888', and 'Address' with the value '200 Warehouse Ave'. At the bottom right of the window are two buttons: 'Save' and 'Cancel'.

After clicking the buttons labeled with Add or Update, a new 'modal' window will appear. Clicking the former will open the window empty, while clicking the latter will open the window pre-filled with data from the selected Supplier. When confirming your changes, if you opened the window by clicking 'Update', the changes will be saved to that existing supplier.

Each supplier contains these fields:

- Name: Of the supplier
- Email: Of the supplier
- Phone: Of the supplier
- Address: Of the supplier

Rules

- Name is required
- Email, Phone and Address are optional

Stock

The purpose of this page is to view stock quantities of your store by product.

Main Actions:

- Show Stock: Loads current stock

Secondary Actions:

- Search: Filter stock by product name, code, description or supplier
- Clear Filters: Reset Search

Import

The purpose of this page is to review incoming stock (from orders) and complete them.

Main Actions:

- Show All Imports: Load import summaries grouped by supplier
- Filter: Filter summaries by supplier name, product type and amount range
- Clear Filters: Reset all filters
- Details: Opens details for the selected supplier import

Important Details Window

This is a window that:

- Shows aggregated totals by product
- Shows all order items included in the import

Main Actions:

- Import: Applies the import to stock quantities
- Close: Close the details window

Export

The purpose of this page is to mark the products you sell in your store:

- Select product and quantity, then click Add to build the export list

Main Actions:

- Remove: Remove selected export line
- Notes: Optional notes for the export
- Export: Finalize the export

Rules

- At least one item is required
- Quantity must be a positive number
- Export is blocked if stock is insufficient

Alerts

The purpose of this page is to monitor low-stock items in your store.

This screen lists products below their reorder level. Each card shows:

- Product Name and message
- Current quantity, minimum level, missing to minimum
- Warning or Critical status
- Last restock time

Notifications:

- The app can tray balloon notifications for low stock
- Alerts are rate-limited by a cooldown window

Troubleshooting

During your use of the application:

1. If login fails, verify username/password.
2. A 'Select a ... first' message might appear. This indicates you must select a certain item in the currently open list before you can access that functionality. If you are receiving this message after already selecting an item, contact the manufacturer.
3. If you cannot export, verify available stock in Stock view.
4. If imports are empty, confirm orders exist and are received.
